The Trending Report represents a visual ranking of our formulaic trending analysis. Our calculations forge a unique combination of the stochastic oscillator, the relative strength index, the moving average convergence divergence and the elder ray indicator. This is executed over various equity subsets and durations in order to reflect a wide range of sensitivities to the market data collected. This is not an investment product offering and is provided for investor reference and perspective only. Past performance is not indicative of future results and actual results may vary. © USA Financial
